Coding Roadmap

This roadmap was heavily inspired by <u>WebDevSimplified</u>'s <u>Frontend & Backend Roadmaps</u>, the <u>Next.js Documentation</u>, and the <u>React Reference</u>.

Other Sources: MDN Docs, w3schools, YouTube.

All of these were essential to making this roadmap possible.

It is recommended to follow this roadmap **step-by-step**.

For problems, recommended resources, or other requests, **please refer to this github repo** (a star would also be very appreciated) or send an email to **slab-photo-puppet@duck.com**.

Additional Resources:

- w3schools
 - HTML
 - CSS
 - JavaScript
 - React
 - TypeScript
- React Reference
- Next.js Documentation
- WebDevSimplified
 - YouTube Channel
